1

KYIV SCHOOL OF ENERGY POLICY

ksep.energy/en

It is the first school in the energy sector in Ukraine. Its goal is to create a professional community and organize high-quality training for professionals responsible for reforming and developing Ukraine's energy sector. The school organizes offline and online multi-month training programs, short-term training, workshops, professional courses and speaking clubs of «energy» English.

KSEP cooperates with the USAID, Bruegel, Low Carbon Ukraine, Berlin Economics, LibMod, Friedrich-Ebert-Stiftung, Naftogaz of Ukraine and others.

2

MOBILE APPLICATION «ENERGY ONLINE»

[Google Play](#) and [App Store](#)

The mobile application was designed to improve the interaction between service providers and consumers in the energy sector.

It simplifies access to information and increases transparency in the energy sector.

By using the mobile application, consumers can:

- get an up-to-date information on current tariffs
- check the bill for electricity and gas supply services
- find answers to topical questions regarding subsidies, terms of payment of bills for services, debt repayment, energy savings, etc.

3

ENERGY MAP

map.ua-energy.org/en

The largest database of official data on all domestic energy sectors in Ukraine (300+ unique data sets, grouped into 49 categories). An exceptional service that allows users to quickly and easily find up-to-date statistical and market information on all energy sectors. The collected data are moderated and verified and, if necessary, supplemented with indicators, which significantly facilitate the analysis and use. The data published on the Energy Map meet the highest quality standards and are entirely machine-readable, and can be accessed via the API.

4

ГАЗОТЕКА

GAZOTEKA ONLINE SERVICE

gasoteka.ua-energy.org

It is the first gas price comparison service for household consumers in Ukraine. By using this service, consumers can compare gas prices and change the supplier, saving up to 40% on bills.

5

UKRAINE'S ENERGY TRANSPARENCY INDEX

index.ua-energy.org/en

and ENERGY TRANSPARENCY INDEX: INTERNATIONAL EDITION

[Energy Transparency Index 2020.pdf](#)

The Energy Transparency Index is an annual analytical product, which has been developed to assess the actual state of availability and quality of the information in the energy sector and to diagnose gaps. It covers 210 indicators grouped into 8 categories based on European and global best practices in information disclosure. DiXi Group has analyzed the transparency of the energy sector since 2018. In 2020, the Transparency Index was also extended to the Eastern Partnership countries (Georgia and Moldova).

6

RANKING OF ELECTRICITY SUPPLIERS

[Ranking of Electricity Suppliers.pdf](#)

and RANKING OF GAS SUPPLIERS

[Ranking of Gas Suppliers.pdf](#)

Analytical products are published every six months in Ukrainian and aimed at two target audiences – suppliers and consumers. Rankings allow evaluating electricity and gas suppliers by particular indicators, making analytical generalizations and tracking the progress. Regular updates of the Rankings give consumers an idea of who is who in the market and stimulate healthy competition among companies.

The commercial by-product of the Rankings is systematized data on the TOP-50 electricity and gas suppliers estimates by indicators.

7

ENERGY SECURITY REVIEW

Monthly review of the latest energy security news of Ukraine and the region. It includes a brief analytical report on several vital monthly topics, a list of relevant researches and recommendations. The review is published in English for the EU, USA and Ukraine representatives and distributed via email.

8

«UKRAINIAN ENERGY» WEBSITE

ua-energy.org/en

It is a unique online platform providing daily news about the energy sector, interviews, expert comments, the most popular articles and materials of foreign think-tanks, announcements, and reports on critical events in the industry. The website was founded in 2008. More than 6000 people have subscribed to the 'Ukrainian Energy' Facebook page (<https://www.facebook.com/uaenergy>).

9

NADRAMONITOR

A regular analytical product, offering an overview of the state permitting activities (issuance, sale, revocation of subsoil licenses, including dynamics), updates in legislation on the extractive industry, environment, and energy resources, as well as registered draft laws. NadraMonitor is available as weekly and monthly issues in the Ukrainian language.

10

WEEKLY ANALYTICAL REPORT

dixigroup.org/en/publications-en

It is a concentration of the most important and processed by analysts information on the week's main events in the energy sector of both Ukraine and the world. By reading the several text pages, users have a holistic «snapshot» of key events and trends in energy policy.
